

# PAUL CONTI *Vines*

## *Organic Vines* Sauvignon Blanc 2009

Organically-grown Margaret River sauvignon blanc is used to produce this crisp aromatic dry white wine.

We chose an organic vineyard because it's our firm belief that sustainable agriculture is the way of the future.

Slowly and progressively, all our vineyards will adopt practices that care for the environment.

Southern Margaret River has a cooler, longer ripening period which is ideal for sauvignon blanc.

This wine was made to reflect the vineyard site with little intervention in the winery.

It was picked, fermented in cool stainless steel, and bottled young to retain all its youthful freshness.

Enjoy over summer.
